

Marcin Ogrodniczuk

Data Scientist | Python & SQL | Machine Learning

📞 570-550-2956 ✉ marcinogrodniczuk935@gmail.com 🔗 <https://www.linkedin.com/in/marcin-ogrodniczuk-34b244176/>
🔗 <https://github.com/marcin-ogrodniczuk> 📍 Williamsburg, NY

PROFESSIONAL SUMMARY

Data Science professional with a background in bioinformatics and data analytics, skilled in Python, R, and SQL. Experienced in analyzing complex biological and clinical datasets, building reproducible pipelines, and applying statistical and machine learning methods to generate actionable insights. Strong ability to translate data into clear analytical outputs that support decision-making, reporting, and performance measurement. Detail-oriented, focused on data quality, reproducibility, and delivering reliable insights in healthcare and business settings.

PROJECTS

RAG Pipeline for Biomedical Literature

📅 05/2026 - 05/2026 📍 Stroudsburg, PA

Built a RAG pipeline that ingests over 100 PubMed abstracts and answers natural-language questions with inline citations, running locally via Ollama. (GitHub: p53-rag-pipeline)

- Engineered the full retrieval stack: NCBI Entrez ingestion, semantic chunking (154 indexed chunks), nomic-embed text embeddings, ChromaDB cosine vector search, feeding grounded context to a local llama3.1 LLM via Ollama.

Healthcare No-Show Prediction & Patient Utilization Analytics

📅 04/2026 - 05/2025 📍 Stroudsburg, PA

Built an end-to-end analytics pipeline using EHR and scheduling data to identify drivers of patient no-shows and predict risk. Used SQL and Python for data modeling, EDA, and machine learning, and deployed insights via an interactive Streamlit dashboard to support clinical and business decisions.

- XGBoost model achieved 88% accuracy and 0.76 F1 score through feature engineering and model optimization.

EXPERIENCE

Machine Learning Intern

Mount Sinai Health System

📅 03/2026 - Present 📍 New York, United States

- Built a bioinformatics pipeline for genomic sequence analysis using Python, trained deep learning models (CNNs and sequence models) with PyTorch and scikit-learn, and developed an interactive dashboard for model outputs using Streamlit.

Research Associate II

Sarepta Therapeutics

📅 12/2024 - 05/2025 📍 Durham, North Carolina

- Designed and collaborated wet lab and bioinformatics experiments on SKM-1 cells, analyzing RNA-seq and high-throughput genomic data in R (limma, DESeq2) with FDR correction and generating genomic visualizations.

SKILLS

Python	Pandas	RAG	SciPy	Flask	Scikit-learn	TensorFlow	R	NumPy	SQL	Matplotlib
--------	--------	-----	-------	-------	--------------	------------	---	-------	-----	------------

EDUCATION

	M.S. Data Science Eastern University 📅 01/2025 - 04/2026 📍 Philadelphia, PA	GPA 4.0 / 4.0
	Ph.D. Genetics & Bioinformatics (completed coursework; withdrew) University of North Carolina at Chapel Hill 📅 06/2023 - 12/2024 📍 Chapel Hill, United States	GPA 4.0 / 4.0
	B.S. Biochemistry East Stroudsburg University of Pennsylvania 📅 2018 - 2022 📍 Stroudsburg, PA	GPA 3.8 / 4.0
